Pneumatyczny system ratunkowy do 340kg

Cena	12 550 zł
Dostępność	Dostępny nie wcześniej niż za 2 tygodnie
Czas wysyłki	14 dni

Opis produktu

Cylindron CHA is a launching pneumatic system of rescue parachute for aircraft.

CHA suitable for maximum total weight (aircraft plus aircrew) 340Kg

Maximum airspeed (at deployment) 130 Km/h

Weight about 9 Kg

Outside Diameter = 170 mm

Resurs 20 lat

Przekładanie - serwis co 3 lata

The device is equipped with a pressure gauge to check before each flight the value of the pressure of the gascylinder.

The reading of the pressure gauge must be between 120 and 180 bar, lower readings signify loss of air.

After activation the parachute needs 2 seconds before complete opening.

In case of necessity of use of the device grasp the operating handle and pull thoroughly for a stroke of 10 cm. This requires an effort of about 5 kg .

We think at 100 meters height the parachute open in almost all cases but it could open at 50 meters height or less, it depends on attitude, trajectory and speed.

Revision check mechanical parts and repack every 3 years
